Date: 04/02/13

Notice: November 1, 2016: We are aware of the Colonial Pipeline explosion in Alabama that occurred on October 31st that could cause supply issues for the southeast and entire east coast. Until product inventories return to normal, end users should provide our contractors as much lead time as they can for orders and expect delivery delays. Please inform MMO of any significant issues concerning delivery or other inability to perform. We will continue to monitor the situation and update as needed.

Note: In order to start the delivery clock, a written PO must be issued to the vendor.

02/10/2014 NOTICE:

It is anticipated that there will be another natural gas curtailment this week due to the extreme cold. The last curtailment increased demand for other fuels like diesel (especially off road diesel) and propane. This created shortages for same. Terminals supplied by pipeline (like North Augusta) were impacted the most. It is highly recommended that contract users assess their fuel needs for this week and notify our contractors of same by close-of-business today (Monday 02/10). As stated in the previous notice, we expect our contractors to perform per the terms and conditions of the contract. We appreciate our contract users giving consideration to unusual market conditions and working with our contractors by being as flexible as their operations will allow regarding delivery.

01/30/2014 NOTICE:

As many of you are probably aware, the extreme cold through much of the country has surged demand for all types of heating fuels. The propane shortages appear to be increasing the pressure on diesel supplies in the South East, especially at terminals supplied via pipeline. As of the date of this notice, 01/30/2014, this office has not agreed to any changes in our fuel contracts. This includes pricing and delivery terms. Should a contractor refuse to perform per the terms of the contract, contract users should document the contractor's refusal to perform, source their fuel elsewhere, track their damages (difference between the new source's price and the statewide term contract price), and submit same to this office.

Given the diesel supply problem has been verified, we encourage our contract users to be as flexible as their operations will permit regarding delivery times (contract term is 48 hours ARO). Would seem reasonable to afford the contractors a little more time when we can. However, until posted otherwise, contract users should only be charged the contract price. There should be no additional charges to include freight/transportation.

STATEWIDE CONTRACTS FOR BULK DELIVERIES OF OFF ROAD ULTRA LOW-SULFUR DIESEL (ULSD)

The contracts for tank wagon and transport loads of **Off Road** ULSD have an effective start date of April 02, 2013. **The elimination of the 16 cents per gallon road tax is the principal economic driver for positioning separate contracts for ON and OFF Road ULSD.** This office has received numerous requests from both political subdivisions and state agencies to establish Off Road ULSD contracts.

Off Road fuel has red dye added to indicate it is for off road use only. It is imperative that vehicles operated on the road are not fueled with Off Road ULSD. There is a substantial fine levied if a vehicle is caught on the road with Off Road ULSD in its fuel tank. Contract users, who purchase and store both On and Off Road ULSD, need to store the 2 products separately. Some typical applications of Off Road ULSD are as follows:

1. Heavy equipment that is not operated on roads
2. Generators
3. HVAC for buildings

Questions regarding this notice should be addressed to Rob Malpass, Procurement Manager (phone: 803-737-5769, e-mail Remalpass@mmo.sc.gov).
