Intent to Sole Source

SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION

The South Carolina Department of Transportation is seeking information for Structural Health Monitoring (SHM) System. Following are the specifications for the system:

1. Requirements for the system:
 - a. Proposed sensor system software shall be capable of remote upgrade, remote rebooting, remote diagnostics, remote changes to sensor data capture frequency and reporting times, and capable of capturing "on demand" readings at any time.
 - b. Proposed controller system shall capture and store the data locally, then transmit the data wirelessly to a Network Operations Center (NOC), for secure storage and 'on-demand' data accessibility to any number of preauthorized personnel. Such NOC should have a demonstrated data reliability of five 9's, or 0.99999.
 - c. Proposed sensor system will be furnished by one entity responsible for system integration on a turnkey basis.
 - d. Proposed sensor controller will be configured to allow capacity for future upgrades on a TBD basis.
 - e. Proposed sensors and systems must be compatible with currently deployed structural monitoring technology.
 - f. Proposed sensor system must have the ability to "alarm" the sensor readings with interrogations every minute, then providing e-mails or other electronic means of contact to key SCDOT personnel if predefined limits of displacement/strain /crack growth or propagation are exceeded.
 - g. Sensor capable of capturing both current and maximum displacement/strain values (without uninterruptible power supply).
 - h. System must have an information presentation protocol that utilizes the Internet, allowing SCDOT engineers to view the complete sensor database 'on-demand' from their desktop computers, download the captured data on Excel spreadsheets, or capture new data "on-demand".

2. Requirements for use of maximum strain sensors:
 - a. Proposed sensors shall have two channels, capable of capturing both current and maximum displacement/strain readings (either tension or compression);
 - b. The maximum displacement/strain channel must also be capable of capturing maximum displacement/strain data without power.
 - c. Proposed sensors shall be used for both instantaneous and maximum displacement/strain; and be capable of use in applications for crack growth/propagation; and out-of-plane bending.
 - d. Proposed sensors shall be housed in rugged casing, have a calibrated resolution of <3 microns and accuracy of <5 microns.
 - e. Proposed sensors shall capture maximum displacements of up to 11mm without continuous power supply.
 - f. Proposed sensors shall be capable of surviving in harsh outdoor environments and be fully cover-able after installation.
 - g. Proposed sensors shall have a maximum displacement/strain channel that is manually re-settable.
 - h. Proposed sensors should have a of successful deployment in field applications including bridges, buildings, parking decks, tunnels, etc. in outdoor or harsh environments, improving owner reliability

 - i. Proposed sensor technology and system configurations shall have broad application use, e.g. displacement, strain, crack width, crack propagation, out-of plane-bending, and element to element displacement (bearing to member), reducing system complexity and owner costs.
 - j. .
 - k. Proposed sensor technology will have proven field durability without maintenance, reducing owner costs.
 - l. Proposed sensors will not require field calibration or periodic temperature correction, reducing owner costs and complexity.
 - m. Proposed sensors can be configured to read either tensile or compressive displacements/strains.
 - n. Proposed sensors can be reused, reducing owner costs.
 - o. Proposed sensor technology shall be use-able on either steel or concrete members, increasing owner flexibility.

If you have a product that meets or exceeds the above specifications or if you have questions please contact Vickie Stephens at stephensvw@scdot.org by 6/17/2015.

VENDORS, DON'T NEGLECT TO CHECK THE STATE'S FIXED PRICE BIDS

If authorized by the original solicitation, the State may use "competitive fixed price bidding" to create procurements with an open response date. These fixed price bids are advertised in SCBO once, but the solicitation may provide for bids to be accepted continuously or periodically during the contract term. The links below take you to a listing of all open solicitations conducted by the central purchasing office using the competitive fixed pricing bidding rules.

Cooperative Purchasing Notice

Description: PHARMACEUTICALS, OVER-THE-COUNTER (OTC) PRODUCTS, VACCINES, MEDICAL SUPPLIES, DENTAL SUPPLIES, NUTRITIONALS, CONTAINERS & VIALS, RETURNED GOODS PROCESSING, DRUG TESTING, PRIME VENDOR / DISTRIBUTOR, & INVOICE AUDITING SERVICES – STATEWIDE TERM CONTRACTS – STATE OF SOUTH CAROLINA

The State of South Carolina currently participates with more than 40 other states & various political subdivisions in a cooperative purchasing agreement with the Minnesota Multi-State Contracting Alliance for Pharmaceuticals (MMCAP).

The Alliance issues solicitations for the goods & services referenced above at various times throughout the year. Interested SC vendors may obtain a copy of MMCAP solicitations from the MMCAP website, www.mmcap.org. From the home page, click on "Vendors & RFPs," then click on "Open RFPs" (link is in the left margin). Click on the applicable RFP link.

As a MMCAP member State, the State of South Carolina is a party of interest in all MMCAP solicitations & currently participates in several of the resulting contracts. The State may elect to participate in additional MMCAP contracts or discontinue participation in select contracts at any time based on the State's best interest.

South Carolina vendors may send their questions or comments regarding this matter to Allen Register, Procurement Manager, aregister@mmo.sc.gov.
