

SCPro — Where Do I Work After SCPro Release 1?

One-page quick guide for statewide procurement users

SCPro is South Carolina's new web-based procurement platform. The state is implementing it in phases to modernize procurement while limiting disruption to ongoing agency operations. The new platform is designed to reduce manual processes, improve contract search and collaboration, and increase procurement visibility and transparency.

Beginning at Release 1 go-live, **Supplier Management, Sourcing and Contracting activities will be performed in SCPro**. New contracts will be created in SCPro.

Existing contracts remain in SRM. They will not move to SCPro as part of Release 1. Updates to those contracts that do not require a new contract number will continue in SRM. Shopping carts and purchase orders remain in the SCEIS Supplier Relationship Management (SRM) module. Inventory and plant maintenance processes do not change in Release 1.

RELEASE 1: Supplier Management + Sourcing + Contracting move to SCPro

If you are doing this...	Work here	What it means
Supplier management or supplier registration activity	SCPro	Supplier Management is part of Release 1.
New solicitation/sourcing event	SCPro	Create and manage new sourcing activity in SCPro.
New contract	SCPro	New contracts are created and awarded in SCPro.
Existing contract — no new contract number required	SCEIS SRM	Continue contract administration in SCEIS SRM.
Existing contract change that requires a new contract number	SCPro	Process it as a new contract in SCPro.
Shopping cart	SCEIS SRM	Shopping carts and approvals stay in SCEIS SRM for Release 1.
Purchase order	SCEIS SRM	Purchase orders stay in SRM for Release 1.
Inventory or plant maintenance	Existing process	No Release 1 process change.

WHAT CHANGES	WHAT STAYS THE SAME	DO NOW	AT GO-LIVE (Nov. 9, 2026)
Supplier Management, Sourcing and Contracting move to SCPro.	Existing contracts, shopping carts and POs stay in SRM; inventory/PM unchanged.	Bookmark resources, review QRGs in MySCLearning, know your role, review in-flight work and local support contacts.	Use SCPro or SCEIS SRM based on the activity above.
