CITY OF ROCK HILL, SOUTH CAROLINA

The City of Rock Hill (City), South Carolina provides wastewater treatment and transportation services to more than 31,000 residential and commercial customers in Rock Hill and the surrounding area. Collected wastewater is conveyed through the City's network of gravity sewers and pump stations/forced mains to the City's main sewer outfalls. The outfalls lead to the City's Manchester Creek Wastewater Treatment Plant (MCWWTP), where the wastewater is treated, and recovered water discharged to the Catawba River under NPDES Discharge Permit SC0020443.

This project includes the replacement of two gravity sewers that run parallel to Anderson Road (US 21 Bypass) from the City's Manchester Creek Outfall near Dave Lyle Boulevard (SC 122) south across Princeton Road to a location near the US 21/Main Street-Christopher Circle intersection. It is the City's intent to combine the wastewater flows of these two sewers into one new 36-inch (anticipated) outfall along an unnamed tributary to Manchester Creek and to remove from service and abandon the two existing gravity sewers.
